

A legacy of learning for the dairy industry

What We Support

Updated 8/20/2014

Gifts to the Professional Dairy Producers Foundation are used wisely in support of producer-driven education initiatives, both locally and nationally. Our strategic direction is set by dairy producers, for dairy producers, and our competitive granting program ensures that any dairy community can apply for funds that will bring great educational ideas to light.

We focus our support in three key areas:

- Raising up the next generation of professional dairy producers
- Growing and maintaining public trust in our people and products
- Building the skills of our dairy producers

| Organization & Program | Focus |
|---|---|
